Flynn Lauridsen

SOFTWARE ENGINEER

OBJECTIVE

My continual goal is to learn new tools, solidify new concepts and perpetually perfect my process. Hence a role with a rotation of fresh challenges and an environment that facilitates my growth will do nothing but serve me well. Additionally, inspiring positive change in the world around me through the software I create will lead to my long-term satisfaction.

EXPERIENCE

JUNIOR DEVELOPER AT SHAREPOINT GURUS

Developed Microsoft and SharePoint solutions to accelerate business process' using tools such as Power Automate and Power Apps. Contributed to SharePoint extensions with Node.js and TypeScript. Designed front-end and UI components for Power Apps and SharePoint extensions.

INTERN AT MACQUARIE UNIVERSITY

Contributed to components and work within the apate.ai project. Implemented Python components and configured Linux and VOIP environments amounting to a proof-of-concept iteration of an AI-driven chatbot. Sought and created sources of evaluation for the chatbot. Engaged heavily in the academic field of cyber security.

JUNIOR SUPPORT OFFICER AT INCONSULT

Performed data analysis on client data using Pandas and Matplotlib. Supported both internal audit projects and cyber security consultancy projects. Developed a small- scale Excel extension using C#. Sourced data for marketing and created draft advertisements using both AI image generation and image manipulation.
